

Leatherman® Skeletool™ and Skeletool™ Cx

Multi-Function, Single Handed Open/Close Pocket Tool

We have waited almost a year to offer this tool! At last year's S.H.O.T. Show, we were shown a prototype of Leatherman's new Skeletool™ and Skeletool™ CX. The basic premise is a really lightweight pocket tool with the most needed features and one hand opening and closing. Includes a 2-1/2" blade and Leatherman's long proven pliers, wirecutters, and universal driver with two double end screwdriver bits. Also includes a removable pocket clip and a bottle opener/carabiner for easy attachment to your clothing or gear. This is truly a pocket tool at only 4-1/8" in length when closed, and a scant 4.4 ounces, and it is shaped to fit comfortably in your hand no matter which feature you are using. Each tool includes two bits - #1 and #2 and 3/16" and 1/4" – which store in the handle. Made in the U.S.A.

We waited. Leatherman® delivered. Now this tool is available to you! Leatherman® Skeletool™ and Skeletool™ CX craft this lightweight pocket tool with tons of uses and one-handed action.

With Leatherman's® proven quality, this tool boasts a 2-1/2" blade, pliers, wire cutters, and universal driver with two double-end screwdriver bits. A removable pocket clip, bottle opener/carabiner for easy attachment to clothing or gear.

4-1/8" length when closed and a lean 4.4 ounces, it's shaped to fit your hand comfortably with each feature used.

#1 and #2 and 3/16" and 1/4" bits tuck neatly into the handle.

Proudly made in the U.S.A.
